

easy access and outstanding quality assurance

**We offer a revolutionary proofing process
and manage your assets for multi-channel
output**

Transactis offers a fully integrated suite of pre-media services to manage and prepare graphic content for any medium. We have the expertise and technology for multi-channel image preparation.

Our secure digital asset management system means our clients have 24/7 visibility and control of their digital assets and digital publications.

Remote online proofing and sign-off also enables quicker campaign deployment. Images can be uploaded from anywhere at any time. Our end-to-end solution manages and optimises digital media from camera to page or web all under one roof.

- Manage, prepare and optimise any graphic content
- Store digital assets in a secure, single repository that gives easy and instant access with all images ready to use for multiple media
- Provide any type of image manipulation - retouching, colour correction, editing, re-formatting
- Give online access to digital assets - including remote viewing, proofing and sign-off
- We manage, process and optimise over 70,000 images each year for one client alone

Benefits

- Complete visibility and control of digital assets
- No need to manage multiple supplier relationships - from camera to page all under one roof
- Instant 24/7 access to fit-for-purpose graphic content
- Image and artwork are easy to find
- Intelligent uploader that pre-flights* images to ensure problems are resolved before the images enter the production workflow
- Remote online access, proofing and sign-off for quicker campaign deployment
- Guaranteed confidence in image quality

* Pre-flighting is the process to ensure digital files are present, valid, correctly formatted and the correct file type.
